Issuance of Potentially Dangerous Dog License (§ 5-1.8)		\$700.00 annually

4:19-15.2a - Evidence of inoculation with rabies vaccine or certification of exemption; requirement for license. No municipal clerk or other official designated by the governing body of any municipality to license dogs therein shall grant any such license and official metal registration tag for any dog unless the owner thereof provides evidence that the dog to be licensed and registered has been inoculated with a rabies vaccine of a type approved by and administered in accordance with the recommendations of the United States Department of Agriculture and the United States Department of Health, Education, and Welfare, or has been certified exempt as provided by regulations of the State Department of Health. Such vaccination shall be repeated at intervals as provided by regulations of the State Department of Health, and shall be administered by a duly licensed veterinarian or by such other veterinarian permitted by law to do the same. The State Department of Health shall promulgate regulations providing for the recognized duration of immunity, interval of inoculation, certificate of vaccination, certificate of exemption, and such other matters related to this act.

PET LICENSING

Pursuant to N.J.A.C. 8:23A-4.2, in order to issue a dog license, the pet owner must first supply to the dog licensing clerk a rabies vaccination certificate signed by a licensed veterinarian indicating that the animal's duration of immunity extends throughout at least the first ten months of the twelve month licensing period. Animals that have a duration of immunity which expires prior to the ten month cut-off must receive a booster rabies vaccination prior to licensure. Boostering an animal before expiration of the previous vaccine has not been associated with an increased occurrence of adverse reactions and is not medically contraindicated.
